ECO-ENVIRO STONE™ 5x10

Eco-Enviro Stone is the sustainable solution for permeable pavements; effectively combining the aesthetics requirements of segmental paving and the function of permeable pavement. Its interlocking joint and micro-chamfered top edge deliver unequalled permeable paver performance, helping to meet current EPA stormwater regulations and LEED certification.

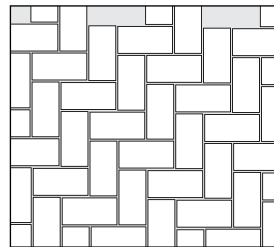

AVAILABLE COLORS

Granite Blend

GRASSTONE™ II

Grasstone II is a versatile surface stabilization product used for both sloped and horizontal applications. The Grasstone II grid paver provides a sustainable solution to surface erosion, allowing infiltration of water and the ability to establish vegetation. Grasstone II reinforces grass areas by providing a concrete matrix support combined with topsoil and vegetative cover. This system can provide substantial pavement strength to minimize rutting and create a suitable platform for intermittent vehicular use. Grasstone II has been used extensively for vegetated fire lane pavements when designed and constructed according to conventional pavement design.

ECO-VENETIAN® Combo

The Eco-Venetian Combo's larger scale lends itself to stately residential settings and more expansive commercial applications. Its modular square and rectangular shapes combine with a nature-inspired cleft surface to create a permeable paver treatment with stunning aesthetic and environmental results. This texture resembles stone facing and invokes a more natural convention.

ADIRONDACK - Tumbled

This captivating series features the historic combination of square and rectangular modules working in tandem to create a random segmental paving surface. A unique cast edge treatment and textured surface replicate the feel of Old World cobble paving. These paving stones are strong and durable enough for residential as well as commercial applications.

COLONY COBBLE® - Tumbled

The Colony Cobble product provides a nostalgic appeal for both residential and commercial environments. The textured surface expresses an aged and weathered appearance suitable for most trafficked pavements. The products running bond pattern conveys a tradition of Colonial architecture and complements any paving treatment. The four individual components merge to create the right and proper appeal. Distinctive in its look, the Colony Cobble is long-established in its allure.

PLAZA STONE

Plaza Stone is a timeless paving stone with an impressionistic embossed surface profile. It creates a gentle and warm effect by combining soft curved edges with rectangular and square stones. Plaza Stone is available in many colors to accommodate the most discriminating tastes. Plaza Stone uses large-scale patterns to create interest and drama for commercial landscaping, while the stone's texture and pattern harmonize with surrounding buildings and site furnishings.

STONEGATE®

Reminiscent of the walls found scattered throughout the European countryside, Keystone's Stonegate features a smooth, weathered stone appearance. Both a backyard and structural solution, Stonegate's refined look combines with unsurpassed design versatility to make it the product of choice for outdoor living projects, freestanding and retaining walls*.

*Retaining walls higher than 3' can be reached with proper engineering and the use of geosynthetic reinforcement.

WALL CAPS & CORNERS

Add the perfect finishing touch of architectural detail with a wall cap. The smaller scale of the cap combines with the larger scale wall unit to give the completed installation a distinctive and unique appearance. The straight corner provides the benefits of constructibility and design versatility.

RUMBLESTONE® COLLECTION

Reminiscent of our fondest childhood toys, the innovative RumbleStone collection provides a set of rustic building blocks for your outdoor hardscape projects. Whether your project is simple or complex, large or small, RumbleStone's possibilities for creative expression are as limitless as your inner child's imagination. The four tumbled RumbleStone sizes can be assembled in an endless variety of configurations and orientations. In addition to simple running bond patterns, the stones can be easily stacked with insets, moved forward and backward, horizontally and vertically, for more aesthetically pleasing visual relief and texture. What will you create?

ACCESSORIES

NATURAL LOOK SEALER – Water-based penetrating silicone sealer waterproofs and protects concrete, brick, masonry, pavers, and stucco surfaces. Clear sealer does not change the surface appearance. Seals from water, salts, and oils. UV Resistant.

Use For: Driveways • Patios • Walls • Sidewalks • Pre-stress panels • Retaining walls • Tunnels • Loading docks • Bridge columns • Tunnels • Curbs/steps

WET LOOK HIGH GLOSS SEALER – Water-based penetrating silicone sealer waterproofs and enhances the color of concrete, masonry, brick, paver, and natural stone surfaces. Seals from acids, grease, food stains, oil, salt, and more. UV resistant.

Use For: Decorative concrete • Pavers • Natural stone • Exposed aggregate • Brick • Stucco

COMMERCIAL GRADE POLYURETHANE CONSTRUCTION ADHESIVE – High performance, commercial grade adhesive designed for permanently bonding concrete, brick, marble, stone, wood, glass, aluminum, steel, PVC and tile.

Use For: Repairing broken concrete • Bonding retaining wall block and caps

POLYMERIC SAND - Polymeric Sand is a precise mixture of polymer binders and clean natural sand. Polymeric Sand will bond with the pavers/stones adding strength to the joint as well as reliability to the pavement system. It is ideal for use on any paver surface such as sloping areas, driveways, patios, pool decks, sidewalks, etc.

Use For: Driveways • Sidewalks • Pool decks • Patios

BEFORE - NO SEALER

AFTER - WITH SEALER

COLOR VARIATIONS

As in all natural materials, color in paving stones and wall stones has inherent variations. Paver and wall color is affected by the variances in the raw materials, concrete mixture, moisture content, climactic conditions, and other variations. Therefore, the colors shown are approximate representations of paver and wall colors, but should not be expected to be an exact match of what will be delivered.

THE NATURE OF EFFLORESCENCE

Another cause of color variation in paving stones and wall stones may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the paver or wall surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.

QUIKRETE and its subsidiaries (collectively QUIKRETE) reserve the right to improve its products and make changes to its specification and design without notice. The information contained herein has been compiled by QUIKRETE and to the best of its knowledge, accurately represents Keystone Hardscapes products and how it may be used in the applications which are illustrated. Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or free-standing walls in many conditions. Structural design and analysis should be provided by a qualified engineer.
